Profile

Frontend Developer and 4th-year Computer Science student at Helwan University with hands-on experience building responsive, component-based web applications using React and JavaScript (ES6+). Passionate about clean UI, performance, and user-centered design. Seeking an internship or junior role to contribute to real-world products.

Education

Bachelor's in Computer Science, Faculty of Computers and Artificial Intelligence, Major of Computer Science, Helwan University, Egypt 2023 – Present

Experience and Internships

Front-End React Trainee, Digital Egyptian Pioneers Initiative 07/2026 – Present

- Developing responsive and interactive web interfaces using HTML5, CSS3, JavaScript, Bootstrap, TypeScript, and React.js.
- Building reusable React components and learning to implement routing, state management, form handling, and API integration.
- Gaining hands-on experience with REST APIs and basic backend concepts using Node.js and Express.js, with a focus on connecting frontend applications to backend services.
- Using Git and GitHub for version control and collaborative development while following modern frontend development practices.

Front-End React Trainee, TechMaster Academy 07/2026 – Present

- Currently participating in an 8-week hands-on training program focused on front-end development
- Building real-world projects using modern web technologies and best practices
- Collaborating with a team to develop projects and simulate real-world workflows
- Gaining experience in responsive design, UI/UX, and JavaScript development

Skills

- **Technical Skills** — HTML5 | CSS3 | Bootstrap | Tailwind | JavaScript (ES6+) | Material UI | React.js | React Router | Context API | REST APIs | Responsive Web Design | Git & GitHub | Vite
- **Language Skills** — Arabic (Native) | English (Intermediate)

Projects

Restaurant Ordering App  , TechMaster Academy 08/2026

- Developed responsive and interactive restaurant interfaces focusing on reusable components and user-friendly UI.
- Implemented dynamic features including menu browsing, category filtering, meal customization, authentication, and order management.
- Integrated frontend components with REST APIs and collaborated with the backend team to connect the application with Node.js and Express.js services.
- Collaborated with a team using Git and GitHub, following a shared development workflow and contributing to the project's frontend implementation
- **Technologies:** React.js | JavaScript | Tailwind CSS

Student-Hub Dashboard , **TechMaster Academy**

07/2026

- Built a responsive web application as part of a collaborative team project
- Developed reusable UI components (cards, buttons, input fields) and contributed to feature implementation
- Implemented form validation and modal-based resource creation to improve data accuracy and UX
- Designed interactive resource cards with actions (add, delete, mark as done) and responsive layouts
- **Technologies:** React | Tailwind CSS

PulseFit , **TechMaster Academy**

06/2026

- Developed a responsive smartwatch landing page
- Implemented dark mode with localStorage and built a mobile-friendly navigation menu
- Designed clean UI with smooth animations and fully responsive layout
- **Technologies:** HTML | CSS | JavaScript
